Curriculum Vitae

Research Profile

Methodological statistician with an exceptional track record of independent research. Expert in robust statistical inference, survival analysis, and extreme value theory. Currently working on extending change-permitting GEV models with L-Moments for small-sample environmental extremes. Combines a full-time public service career (Pakistan Railways Police) with high-level academic output, demonstrating exceptional discipline and time-management.

Thesis Focus: *Power Comparison of Several Well-Known Normality Tests: A Rigorous Simulation and Real-Life Data Study.* Developed novel robust tests (MSK, JB*, JB**) validated via 20,000 Monte Carlo replications.

Current Research: Extending L-Moments estimation for change-permitting GEV models (Prosdocimi & Kjeldsen, 2021) for accurate small-sample environmental risk assessment.

Academic Education

2023 – 2025

Master of Philosophy (M.Phil.) in Statistics

PMAS-Arid Agriculture University, Rawalpindi, Pakistan

CGPA: 3.48/4.00

Thesis: *Power Comparison of Several Well-Known Normality Tests: A Rigorous Simulation and Real-Life Data Study*

Coursework: Operations Research Models, Applied Multivariate Analysis, Applied Survey Sampling, Randomized Models for Sensitive Data, Econometrics Techniques and Applications, Applied Numerical Analysis, Statistical Package, Applied Experimental Design, Applied Sampling Techniques.

2019 – 2021

Master of Science (M.Sc.) in Statistics

Allama Iqbal Open University, Islamabad, Pakistan

Percentage: 59.00%

Coursework: Statistical Methods, Sampling Methods, Advanced Calculus, Probability & Distributions, Non-Parametric Methods, Mathematical Methods for Statistics, Statistical Inference (Estimation & Testing), Econometrics, Total Quality Management, Computer Programming (C++), Regression Analysis, Experimental Design, Applied Multivariate Analysis, Data Analysis and Statistical Packages, Operations Research.

Peer-Reviewed Publications

- 7 Total** (6 as **First Author**) in high-impact journals (Taylor & Francis, REVSTAT, Croatian OR Review).
- 2026** Bokhari, S.W.A., & Ali, N. *Multimethod survival analysis of mortality predictors in advanced heart failure: a cohort study from Pakistan*. **Biostatistics & Epidemiology**, 10(1), 2640689. (Taylor & Francis). DOI: [10.1080/24709360.2026.2640689](https://doi.org/10.1080/24709360.2026.2640689)
- 2026** Bokhari, S.W.A., & Ali, N. *Robust modifications of the Jarque-Bera test: enhanced sensitivity and size control in normality testing*. **Communications in Statistics - Simulation and Computation**. (Taylor & Francis). DOI: [10.1080/03610918.2026.2665386](https://doi.org/10.1080/03610918.2026.2665386)

Curriculum Vitae (Continued)

Research Experience

- 2023 – 2025** **Independent Researcher (M.Phil. Thesis)**
PMAS-Arid Agriculture University, Rawalpindi, Pakistan
- Developed the "MSK Normality Test" and robust JB variants (JB*, JB**) validated via 20,000 Monte Carlo replications across 14 probability distributions.
 - Applied multi-method survival analysis (Cox PH, Bayesian Cox, Random Survival Forests) to identify clinical mortality predictors in heart failure cohorts.
 - Currently expanding research on L-Moments estimation for change-permitting GEV models (Prosdociimi & Kjeldsen, 2021) to improve small-sample extreme value analysis.
- 2025 – Present** **Visiting Lecturer**
Dept. of Statistics, PMAS-Arid Agriculture University, Rawalpindi, Pakistan
- Delivering graduate-level lectures on Hypothesis Testing, Regression Analysis, and Nonparametric Statistics.
 - Supervising student research projects and curriculum development.

Professional Experience

- 2017 – Present** **Constable**
Pakistan Railways Police, Islamabad, Pakistan
- Maintain public safety and order while simultaneously completing a rigorous M.Phil. and publishing 7 peer-reviewed articles.

Curriculum Vitae (Continued)

Skills & Honors

Statistical Software	R: Advanced (Simulation, Modeling, Visualization); SPSS: Intermediate; MATLAB: Intermediate.
Programming	C++ (Intermediate); Python (Basic).
Documentation	LaTeX: Advanced; Microsoft Office Suite.
Analytical Methods	Survival Analysis (Cox PH, Bayesian, RSF, AFT), Extreme Value Modeling, L-Moments Estimation, Monte Carlo Simulation, Robust Normality Testing, Regression Modeling, Experimental Design.
Awards	Certificate of Appreciation (2024) – Awarded by PASTIC (Pakistan Scientific & Technological Information Centre) for organizing the "Project Awareness Seminar & Training Workshop: Capacity Building Program for Editors of National Research Journals" at University of Sindh, Jamshoro.
Languages	Urdu (Native); English (C1 Fluent).
